BODY RESCUE PRODUCTS

Body Rescue gives you the tools you need to monitor and master your acid/alkaline balance for better health and better nutrition. The body must maintain a pH within a very small range (near 7.0 on the acid/alkaline scale) in order to function optimally, digest and absorb nutrients from the diet, and keep every cell as healthy as can be. Too often, however, we find ourselves in an acid state; a state where digestion is difficult, cells are starving and fatigue is sustaining.
